Include a brief description of the design, elaborating on the conceptual and graphic elements (250 words)

## Sanctuary Banner to Protect Immigrants, Other Targeted Populations

The call, from a coalition of individuals and groups working alongside the official New Sanctuary Coalition NYC, is for a graphic design that would convincingly convey the principles and politics of the Sanctuary project to all. The design (to be used on pins, stickers, posters, etc.) will be posted by organizations, institutions or individuals that want to demonstrate their support for or status as sanctuary.

After the recent election, many communities have felt more vulnerable than ever. Trump's rhetoric, Federal immigration enforcement authorities and parts of the populace have been lined up against undocumented migrants but also against non-white immigrants, Arab and Muslim citizens, people of color, activists and dissenters of any stripe. It is important that we be able to say NO! to such actions, policies and laws.

Use the information below, along with on-line resources and other research into the history and goals of the sanctuary movement to guide your design process.

The design should provide the movement with a graphic identity, embody the motto of the coalition – 'a radical welcome' - and include the word sanctuary.
